## Reach Foundation

The Reach Foundation is a year-round operation that makes soap and wood products for conferences, events, retail, or gifts. Our soaps come in different shapes including a starfish, lobster, seashells, and bars which can be scented in a wide range of smells and colours. We also create custom orders based on our customers' ideas and creativity!

Our main staple in the wood shop (and our speciality) are cutting boards. Working with our trained woodworkers youth learn how to make beautiful, fine wood products. These are wonderful gifts for speakers or special guests and we can also accommodate larger orders and different sizes depending on your needs.

The Reach Foundation is a safe, stigma-free environment for youth who are transitioning from mental health and addiction treatment to recovery and reintegration into the community. Reach provides a safe, caring and supportive learning environment for youth and assists them to develop confidence and employability and essential life skills to help them adapt as they transition to the workforce or back to school. All profits from our social enterprise go directly back into our programs so that we can support as many youth as possible with addictions and mental health on the Island!
