

YOU'RE INVITED

To host your next Natural Resources Meeting on Prince Edward Island

While Prince Edward Island may be Canada's smallest province, its richness in natural resources has put this province on the world stage, leading the way in renewable energy, agriculture, aquaculture, and the technological investments that go along with it.

In the 1970's, PEI became a continental leader in experimentation with renewable and efficient energy technologies as a result of the strong grassroots environmentalist movement.

Aspin Kemp & Associates

A systems integrator and engineering company delivering innovative solutions to island and microgrid power systems. AKA has shifted the paradigm for fuel efficiency and reliability in offshore drilling with proven fuel savings over 50% and similar results in marine and land-based microgrids.

Red Rock Power Systems Inc.

Develops and commercializes fuel cell solutions for a zero emissions marine industry, delivering top of the line products alongside world leading partners and suppliers.

PEI Energy Corporation

Develops and promotes green energy systems and the generation, production, transmission and distribution of energy on an economic and efficient basis in the province. PEI Energy Corp. is known for its multitude of renewable energy operations including: four wind farms, two submarine transmission cables, and multiple large scale renewable energy generators.

\$20 million generated by wind alone in 2018

8000+ employed in the seafood sector

99.2% electricity created by renewable resources

12 cleantech Research Partners

\$938 million economic output from seafood industry (2019)

Notable Companies on PEI

- NorCan Marine
- Atlantech
- Atlantic Advances Power Technologies
- Cascumpec Bay Oyster Co.
- Frontier Power Systems
- Aqua Bounty Canada
- MarineNev
- L&C Fisheries Ltd.
- Atlantic AquaFarms Ltd.
- Rodyney's Oyster Depot

DID YOU KNOW...

25% of PEI's electrical needs are met by wind energy—one of the highest percentages in North America.

Conferences

- 2017 Canadian Natural Resources Law Enforcement Chiefs
- 2018 ISAAH (International Symposium on Aquatic Animal Health)
- 2019 Atlantic International Chapter of American Fisheries Societies
- 2022 Aquaculture Association of Canada Conference

"On Prince Edward Island the seafood industry is both a valued tradition and a diverse, innovative industry. These investments recognise the importance of the wild-catch fishery, the strength of aquaculture, and the emerging potential of value-added processing. I look forward to seeing Island seafood grow in importance and prominence as a job creator and community builder."

The Honourable Jamie Fox, Prince Edward Island Minister of Fisheries and Communities
